OUR BUSINESS

OPERATIONAL LEASING

Operational leasing is a type of leasing agreement where a company rents assets, such as vehicles or equipment, for a specific period of time. Unlike financial leasing, operational leasing does not involve ownership transfer at the end of the lease term. Overall, operational leasing offers businesses a flexible and cost-effective solution to acquire and manage assets without the burden of ownership. It can be a strategic option for companies looking to optimize their operations and focus on core business activities.

REAL ESTATE

Real estate refers to property consisting of land and the buildings on it, along with its natural resources such as crops, minerals, or water. It encompasses residential, commercial, and industrial properties. Real estate is a valuable asset class that can be bought, sold, or rented for various purposes, including living, working, or investing. The real estate industry involves professionals such as real estate agents, brokers, developers, and investors who facilitate the buying, selling, and management of properties.

MANUFACTURING

Manufacturing is the process of converting raw materials or components into finished products through various techniques and processes. It involves the use of machinery, tools, and labour to transform materials into goods that can be sold or used by consumers. Manufacturing plays a crucial role in the economy by creating jobs, generating revenue, and providing essential products for everyday life. It encompasses a wide range of industries, including automotive, electronics, pharmaceuticals, food and beverage, and many others.
